

WARREN B. NELMS INSTITUTE FOR THE CONNECTED WORLD HOSTS

WOMEN IN IOT WORKSHOP 2021

"AI on the Edge"

IoT, in convergence with artificial intelligence (AI) and big data analytics, is rapidly changing our lives and society at large. For the 2021 workshop, we have invited leading industry researchers, academics, and government funding program managers to give their perspective on the future of this trend.

Students are invited to submit poster abstracts. See the workshop website for more details.

The goal of the workshop is to bring together women leaders from all sectors of IoT and students interested in IoT to promote and enable increasing participation of women and address the gender gap issue in the field of IoT.

DATE: Wednesday, September 22, 2021

TIME: 1pm - 5pm EST

REGISTRATION: Free

DELIVERY: Via Zoom (Registered attendees will be emailed the access information)
